

JOB DESCRIPTION

Job title:	District Officer SMC	Location:	Mozambique, Nampula
Department:	Technical	Length of contract:	Indefinite
Role type:	National	Grade:	7
Travel involved:	50% Travel within District	Child safeguarding level:	1, high risk
Reporting to:	Line manager: Technical Specialist SMC	Direct reports:	None

Organisational background

Established in 2003, Malaria Consortium is one of the world's leading non-profit organisations specialising in the comprehensive prevention, control and treatment of malaria and other communicable diseases among vulnerable and under privileged populations. We increasingly find our work on malaria can be effectively integrated with other similar public health interventions for greater impact and therefore expanded our remit to include child health and neglected tropical disease interventions.

We work in Africa and Asia with communities, governments, academic institutions, and local and international organisations, to ensure effective delivery of services, which are supported by strong evidence.

Our areas of expertise include:

- disease prevention, diagnosis, and treatment
- disease control and elimination
- systems strengthening
- research, monitoring and evaluation leading to best practice
- behaviour change communication
- national and international advocacy and policy development

Project background

Malaria Consortium began working in Mozambique in 2005, supporting the development of distribution systems for long lasting insecticidal nets in the country. Our work grew from there to focus on public health communications that sought to increase malaria awareness and preventive behaviours, particularly among school children and teachers. Using malaria as an entry point, we expanded into integrated community health projects that focused on diagnosing and treating the most common childhood illnesses – mainly malaria, pneumonia, and diarrhoea. Malaria Consortium supports a mobile health platform (UpScale) for the community health worker's country program an initiative to strengthen surveillance system in Mozambique for better decision making based on timely and reliable malaria data. Throughout, we have consistently strived to integrate our work into government-led health programmes and ensure sustainability.

To prevent malaria in those most vulnerable to the disease's effects in areas where malaria transmission is seasonal, the World Health Organization (WHO) recommends seasonal malaria chemoprevention (SMC). SMC is the intermittent administration of monthly courses of sulfadoxine-pyrimethamine (SP) and amodiaquine (AQ), or SPAQ, to children between 3 and 59 months during the rainy season. Malaria Consortium has been a leading implementer of SMC since the WHO issued its recommendation to scale up the intervention in 2012.

Malaria Strategic Plan 2017-2022 mid-term review recommended SMC as a strategy to accelerate the impact in provinces with a high burden of malaria. Following an initial pilot phase, SMC was introduced in Mozambique in all 23 districts of Nampula province, reaching approx. 1.3 million children (2022/2023). In 2023/2024 (the second year SMC was implemented at scale) digitalisation was introduced into campaign planning and implementation, reaching approx. 1.5 million children.

Job purpose

The District Officer will support implementation of all SMC intervention components.

The post holder will also contribute to project documentation and reporting, ensuring transparency and accountability. Through establishing close working relationships with district health authorities, health facilities and communities, the post holder will play a critical role in ensuring buy-in for and create ownership of the project from relevant local stakeholders.

Key working relationships

The District Officer will work closely with the Technical Specialist, Project Manager, Procurement and Logistics Manager, Project Assistants and Finance Assistant based in Nampula. Externally, key working relationships will include the District Health Director, District Medical Chief, District Malaria Focal Point and health facility Directors at health facilities participating in the SMC campaign.

Key accountabilities

SMC implementation (70%)

- Coordinate planning meetings at district level, including quantification of required SMC implementers (community distributors, supervisors, town announcers, health facility staff) and commodities
- In consultation with district health authorities, develop detailed district-level plans for community engagement, training, SMC distribution, case management and pharmacovigilance, supervision, monitoring and evaluation
- Throughout the SMC campaign, monitor implementation of the district-level implementation plans, taking corrective action in consultation with the Project Manager, Technical Specialist and district health authority staff as required
- Support health facilities in quantifying the SMC target population in their catchment areas
- Assess health facilities' campaign readiness prior to the campaign and assist in developing health facility-level plans for community engagement, training, SMC distribution, case, management and pharmacovigilance, supervision, monitoring and evaluation
- In collaboration with district health authority staff, conduct community engagement meetings with appropriate community representatives to share information about the project and the SMC campaign
- Support the identification and recruitment of suitable SMC implementers in line with pre-agreed selection criteria
- Participate in a training-of-trainers for SMC at the province level
- Coordinate the delivery of a training-of-trainers at the district level

- Quality assure the delivery of training for SMC implementers at selected health facilities
- Participate in supportive supervision of SMC implementers in selected communities and health facilities during the campaign
- Coordinate district-level review meetings after each SMC cycle, including tracking consumption of SMC commodities, identifying challenges and lessons learnt, and agreeing improvements for subsequent cycles
- Support the implementation of end-of-cycle and end-of-round household coverage surveys as required
- Support the implementation of research activities at district-, health facility- and community level as required
- Participate in a province-level planning and review meetings as required

Procurement and supply management (20%)

- In collaboration with the Procurement and Logistics Manager, ensure accountability of received commodities at district level by ensuring timely and accurate completion of stock management tools and compliance with stock management processes
- Support district health authorities and health facilities in organising the “last-mile distribution” of SMC commodities from the district warehouse to the health facility level, as well as the reverse logistics at the end of each SMC cycle
- Support the Procurement and Logistics Manager in forecasting needs and timely requisitions to ensure stock-outs are avoided during SMC administration
- Support the Procurement and Logistics Manager in monitoring inventory storage and movement records in all district- and health facility-level warehouses involved in the SMC campaign
- Coordinate stock reconciliation meetings at district level after each SMC cycle, compiling and validating stock reconciliation data received from health facilities
- Support the Procurement and Logistics Manager in producing timely stock reconciliation reports at the end of each SMC cycle and at the end of the campaign

Reporting & data quality control (10%)

- Compile and submit meeting minutes, trip reports etc. as required by the Project Manager and Technical Specialist
- Compile, quality assure and submit data for project reporting as required by the Project Manager and Technical Specialist, for example regarding number of SMC implementers trained, number of participants in community engagement meetings etc.
- Support district health authorities in compiling end-of-cycle and end-of-round reports based on reports from health facilities and using the pre-agreed report templates
- Assist the Project Manager and Technical Specialist in queries relating to the timeliness, completeness or quality of research, monitoring and evaluation data
- Compile, verify and maintain a database of SMC implementers, including contact and payment details in each cycle
- Validate documentation relating to procurement and payments at district level as advised by the Project Manager, Technical Specialist or Procurement and Logistics Manager
